KEY INSIGHTS

1. **Education:** Doctorate (74.1%) and Professional School (73.4%) holders are most likely to earn above $50K, compared with 16.0% of HS-grads.
2. **Occupation:** Executive-managerial (48.4%) and Professional-specialty (44.9%) lead; Private-house-service has just 0.7%.
3. **Age:** Earning above $50K is most common at ages 40-59 (~37-38%) and rare under 30 (<8%).
4. **Overall:** Only 24.1% of the 32,537 records earn above $50K.
5. **Note:** Data is from the 1994 US Census (UCI Adult dataset). Findings show association, not causation.
